

School Supply List

****Chromebooks:** This year we are strongly recommending that your child have a personal computer. This computer would be used only by your child. In the event that we are unable to conduct class in the school building, your child will need to have access to the internet and a computer. Teachers will be doing live lessons on a daily basis. We do have computers available at school but are not on a 1:1 ratio. If you are able to purchase a computer for your child, please do. This will allow us to hand out computers to those that are not able to purchase one at this time. We use Chromebooks at the school and have found they are the most affordable and have all the capabilities the students need to do their school work.
